KLAX

A KLAX is three or more tiles of the same color in a row, i.e.

HOW TO PLAY

You play KLAX by moving your paddle left and right and using it to put tiles in the "bin". Your paddle can move to one of 5 positions on the screen:

The paddle can hold up to 5 tiles.

As tiles move down the conveyer, use your paddle to catch them.

Press the 1 Button to flip the top tile on your paddle off into the bin below.

Also, you can press DOWN on the control pad to accelerate the tiles on the conveyer. Use this feature with caution.

There are up to 10 total colors in the game, plus the wild tile. (The wild tile is a flashing block that will substitute for any color.)

Drop meter

If you do not catch a tile with your paddle, it will drop to its death and your drop meter will increase. You have a limited number of drops before your game is over.

When all the lights are ON, your game is over!

HOW TO COMPLETE A WAVE

There are 5 different types of Waves in KLAX.

Type of Wave

"You must get xx* KLAXs."

What to Do

Get the number of KLAXs specified. KLAXs are three or more tiles of the same color in a row.

Type of Wave

"You must get xx* Diagonals"

What to Do

Only Diagonal KLAXs count towards finishing the Wave. You can still get other types of KLAXs, though (and you might need them to survive!).

Type of Wave

"You must catch xx* Tiles"

What to Do

That many tiles must be caught on the paddle to finish the Wave.

Type of Wave

"You must get xxxxx* points"

What to Do

You need to get this many points to finish the Wave. See SCORING for how many points each type of KLAX scores.

Type of Wave

"You must get xx* Horizontals"

What to Do

Only Horizontal KLAXs count towards finishing the Wave. You can still get all types of KLAXs, though.

*x's represent a number based on current Wave.

THE BASIC EXAMPLES OF A KLAX

3 Tiles = 1 KLAX

4 Tiles = 2 KLAXs

5 Tiles = 3 KLAXs

These KLAXs can be done easily by using a wild tile. (W = Wild Tile)

3 X 40,050 Points

2 X 40,000 Points

4 X 50,050 Points

		1		
2	4		3	2
2	4		3	2
1	1		1	1
2	4	1	3	2
2	4	1	3	2

Big Points on Wave 1

Some of these wild tile configurations take a lot of practice. Once you get the pattern down, you can do it with ease.

(A or B) Default is "B"

A "Throw back" a tile even if you are not exactly lined up in a column.

B Must be exactly lined up in one of the five columns to "throw back" a tile.

PDL Accelerator

(0-4) Default is "2". Adjusts the response of the paddle movement (the time that it takes the paddle to move after you move the controller right or left).

0 instant response

4 delayed response

CRT Dot Rate

(Easy, Medium, Hard, Harder) Default is Medium.

The rate at which the wild tile appears differs for each of the Easy, Medium and Hard settings. In the Harder setting, everything is the same as the Hard setting, except the tiles move faster.

Ramping

(On/Off) Default is "Off"

On The game will get harder, the longer that you play.

Off The difficulty stays the same no matter how long you play.

(50% – 150%) Default is "100%". Allows you to adjust the requirements to complete the Wave. 50% makes the game half the difficulty level of the 100% setting. 150% is 1.5 times harder than the 100% setting.

Example:

50% – you must get 5 KLAXs (or 1/2 the points of a point Wave.)

100% – you must get 10 KLAXs (or the standard points of a points Wave.)

150% – you must get 15 KLAXs or 1 1/2 the points of a points Wave.)

Color Adjust

A Yellow text on black background.

B White text on blue background.

PF Brightness

(3-8) Default is "8". Adjusts the playfield background brightness. In pause mode, the background brightness can be adjusted with the 1 and 2 buttons. The position of the playfield can also be adjusted at this time.
